Risk and Resilience in the Face of Global Change

30 November – 5 December, 2015 • Aspen, Colorado
AGCI Mission

To further the understanding of Earth systems and global environmental change in the service of society
Support for this workshop
This week

• Advancing understanding of resilience, inspired by risk
• Learning across the interface of science and practice
• Building new collaborations that support your work as well as the broader community of research and practice

COP 21 Begins!
Welcome to Aspen!
Thank you for coming.

(Please let any AGCI Staff member know if there’s anything we can do to help!)
One definition of resilience

• Reduce the greenhouse gas emissions that contribute to climate change
• Plan for the changes that are underway or anticipated
• Foster social cohesion and inclusion
