

ENSO Predictability and Prediction

Predictability:

1. Why we can predict
2. How far into the future can we (theoretically) predict

What is limiting the predictability?

Model Error, Initial Condition Error, Intrinsic Limits

Prediction:

1. Historical Forecasting (no cheating)

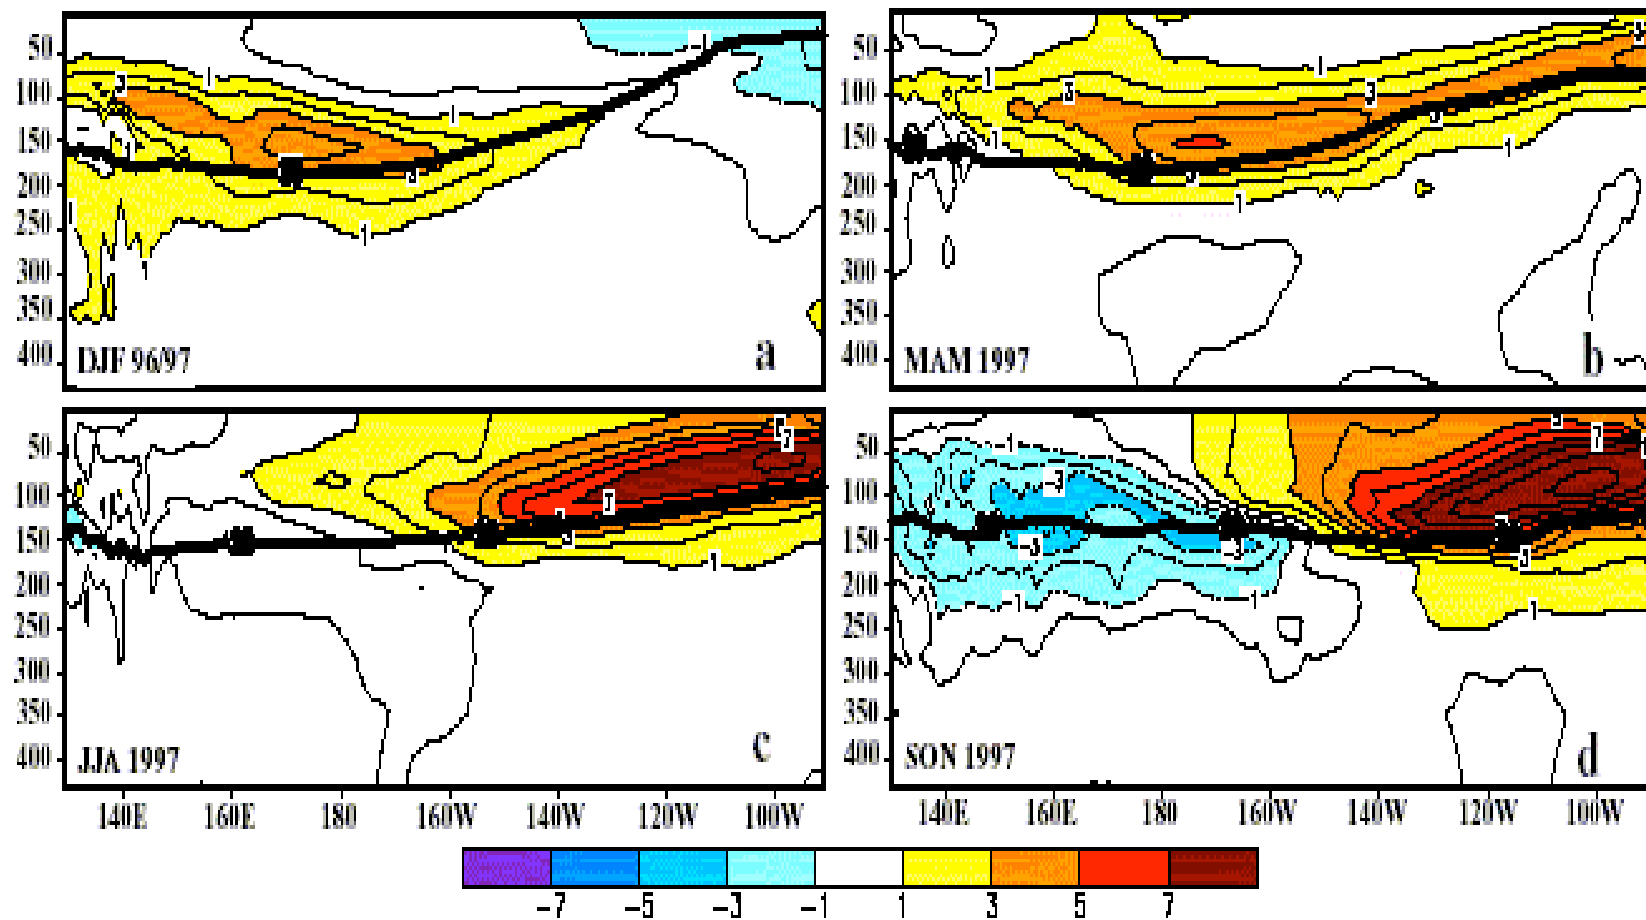

Also predictability!

Need to Assess Forecast Quality

2. Forecasting the Future

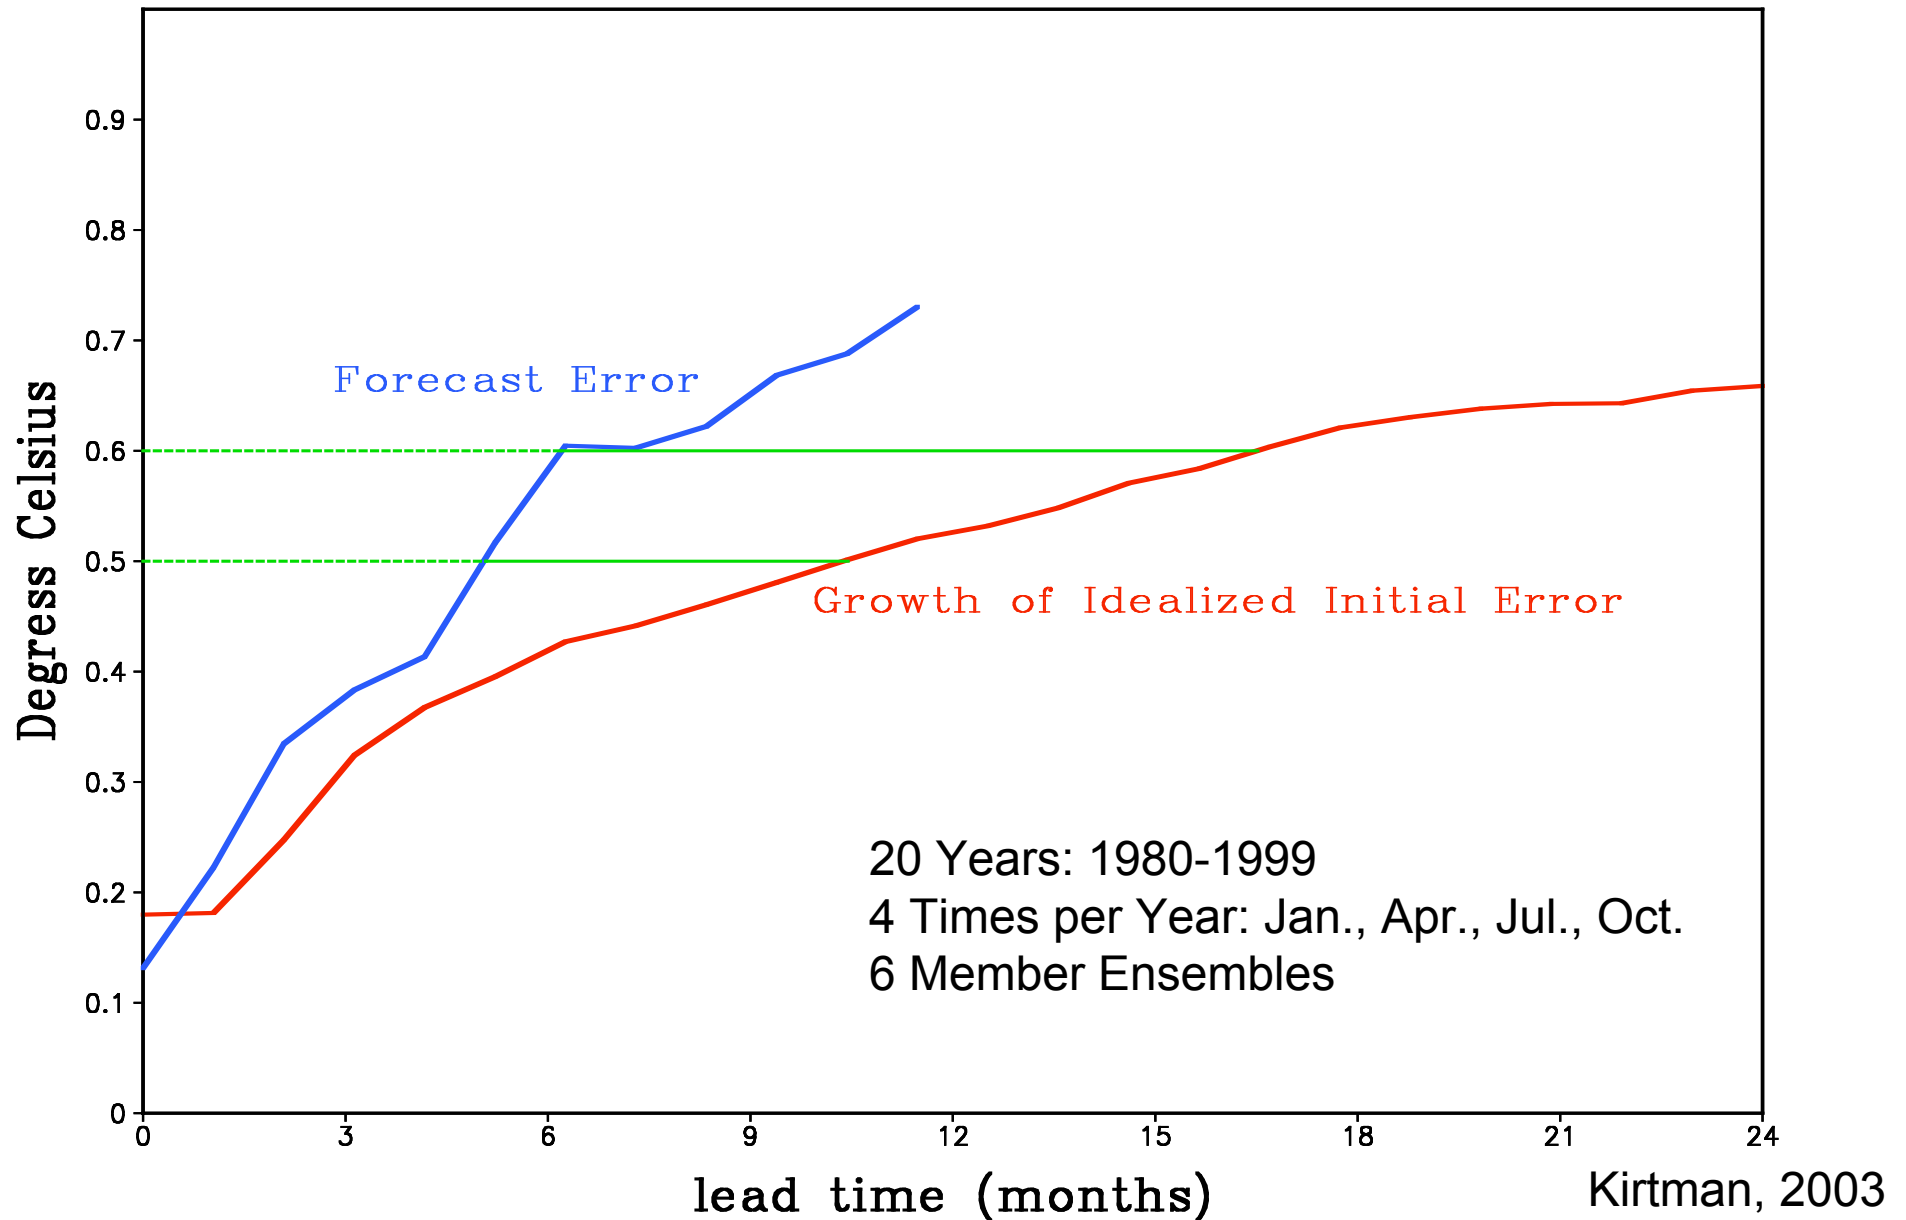

No Substitute for Real Prediction

(I) Predictability: Why We Can Predict (Precursors)

Current Limit of Predictability of ENSO (Nino3.4)

Potential Limit of Predictability of ENSO

(II) Predictability: How Far Into The Future Can We Predict What Limits Predictability

Worst Case: Initial Condition Error (Atmos+**Ocean**) + Model Error

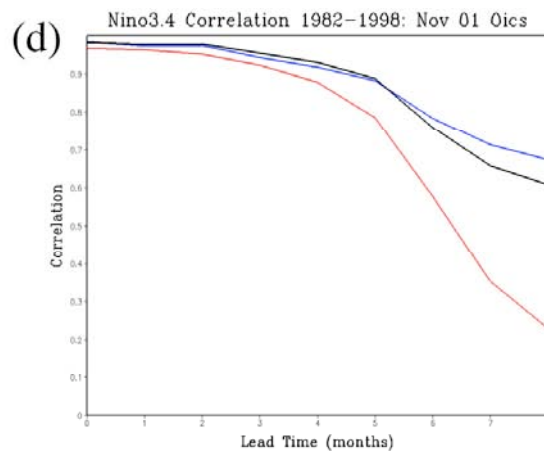

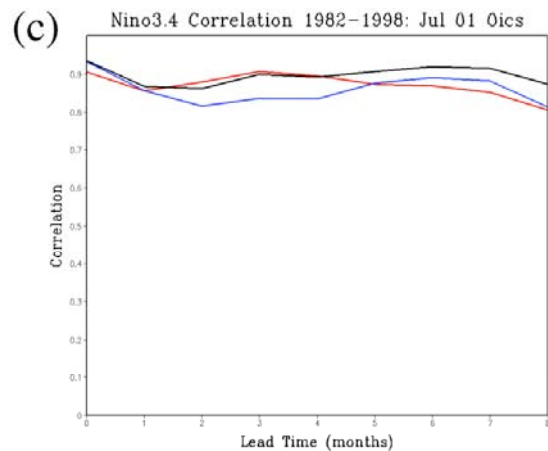

Better Case: Initial Condition Error (Atmos Only) + Model Error

Best Case: Initial Condition Error (Atmos Only) + No Model Error

Historical Forecasting

- CCSM3.0 vs. CCSM3.5
 - Initialization
 - Don't Necessarily Need to Have Your Own Data Assimilation System
 - But Much Better Balanced Initialization Possible
 - Impact of Reducing Systematic Error on Prediction Quality
 - Initialization shock
- Multi-Model
 - Mechanism for Quantifying Uncertainty
- Statistical Forecasting
 - Needed

Nino3.4 Correlation Coefficient

CFS

CCSM

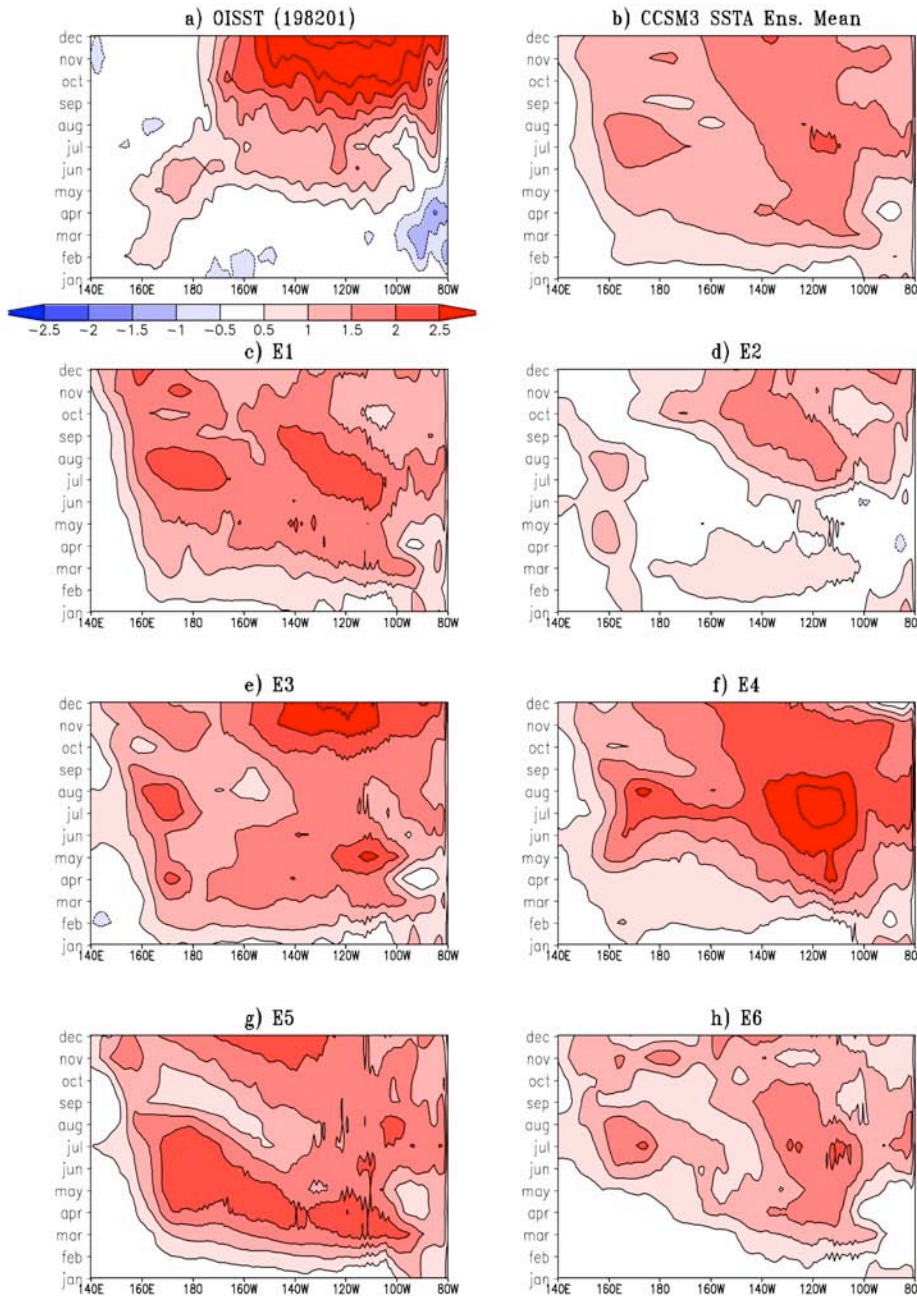

Multi-Model

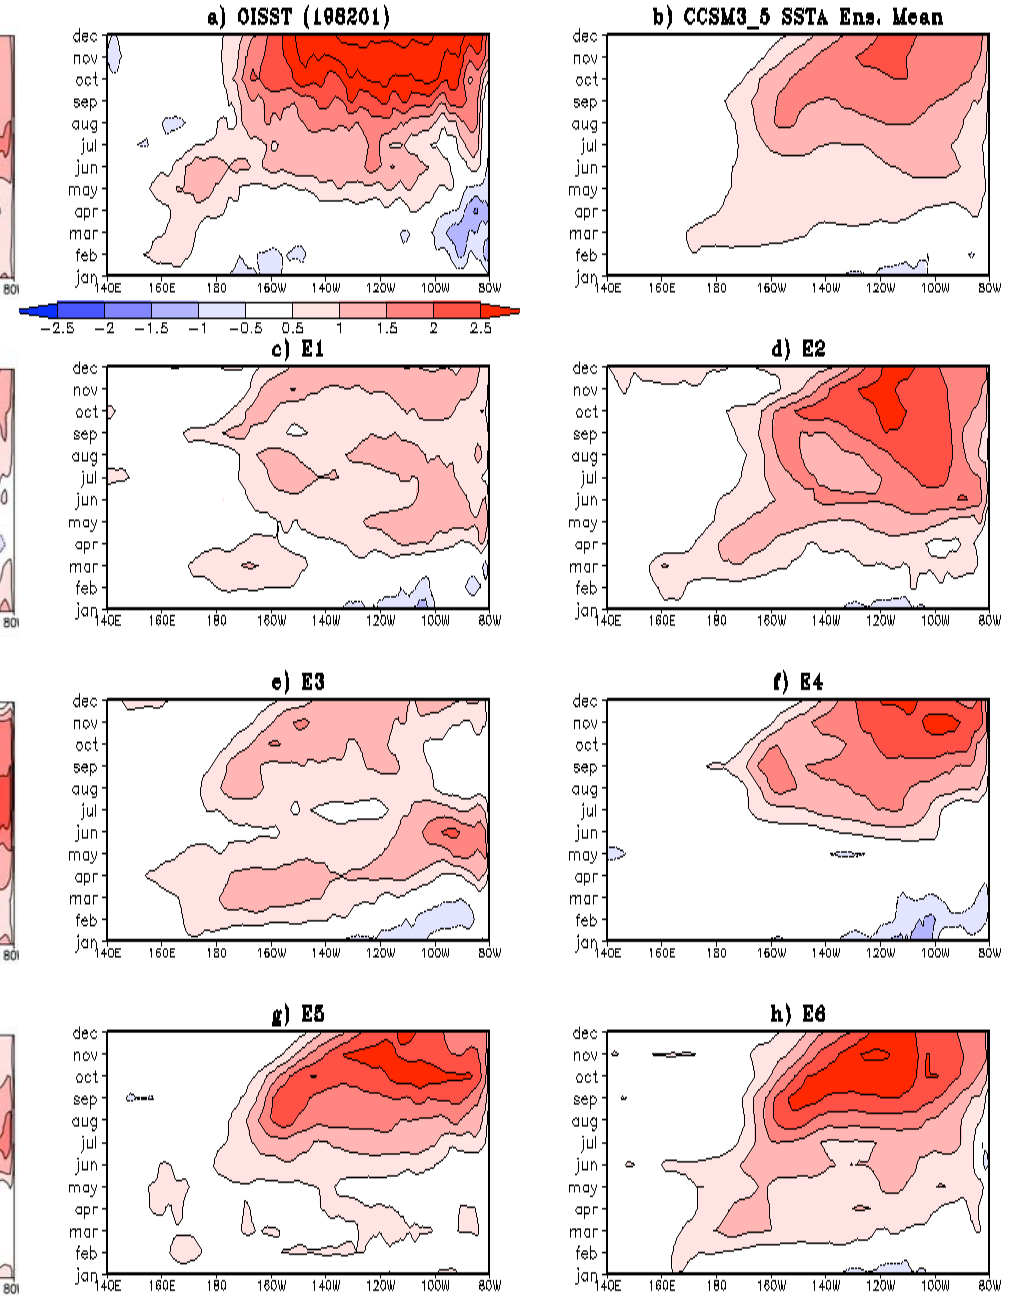

Impact of Reducing Systematic Error

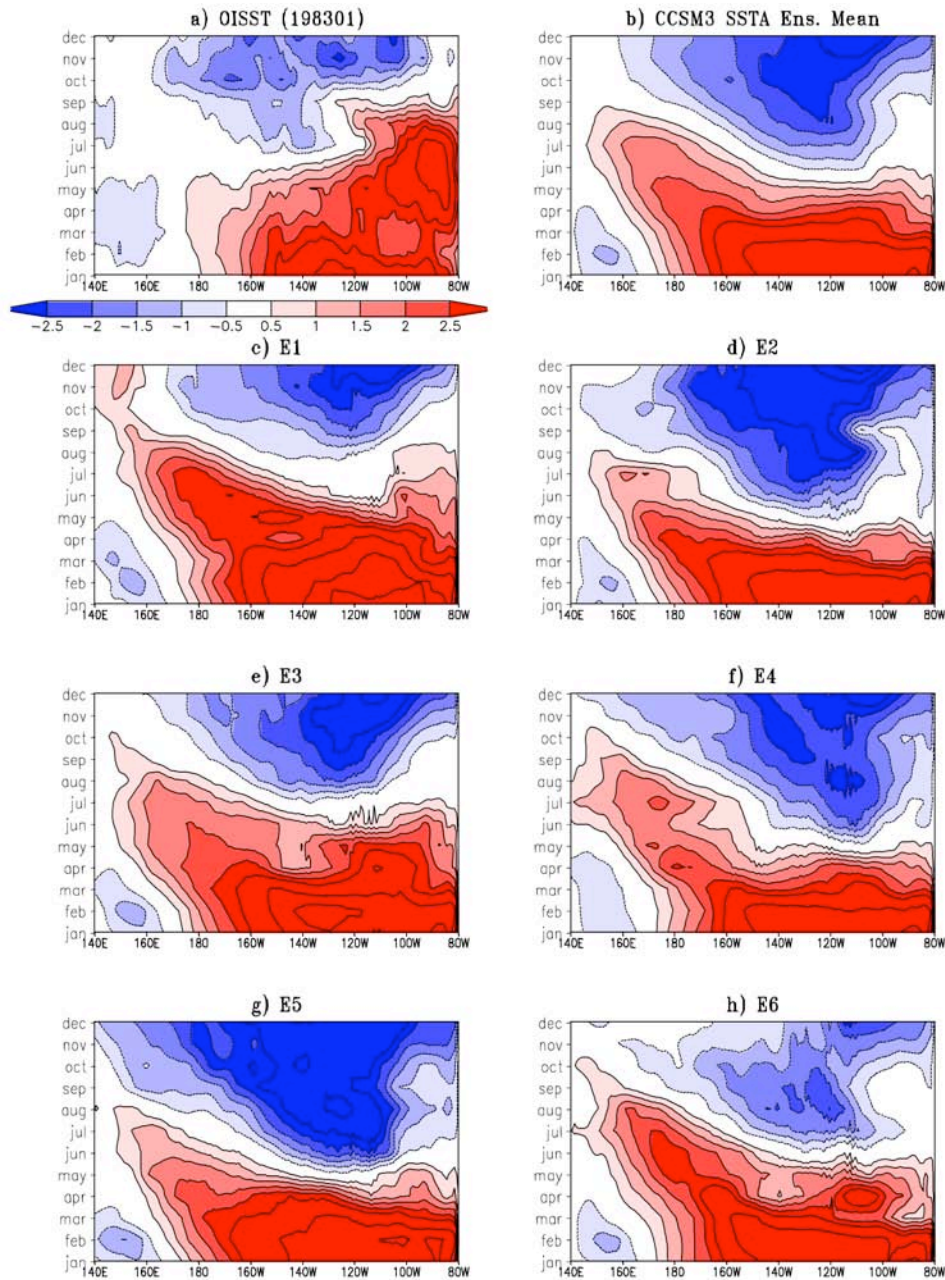

CCSM3.0 Jan 1982 IC

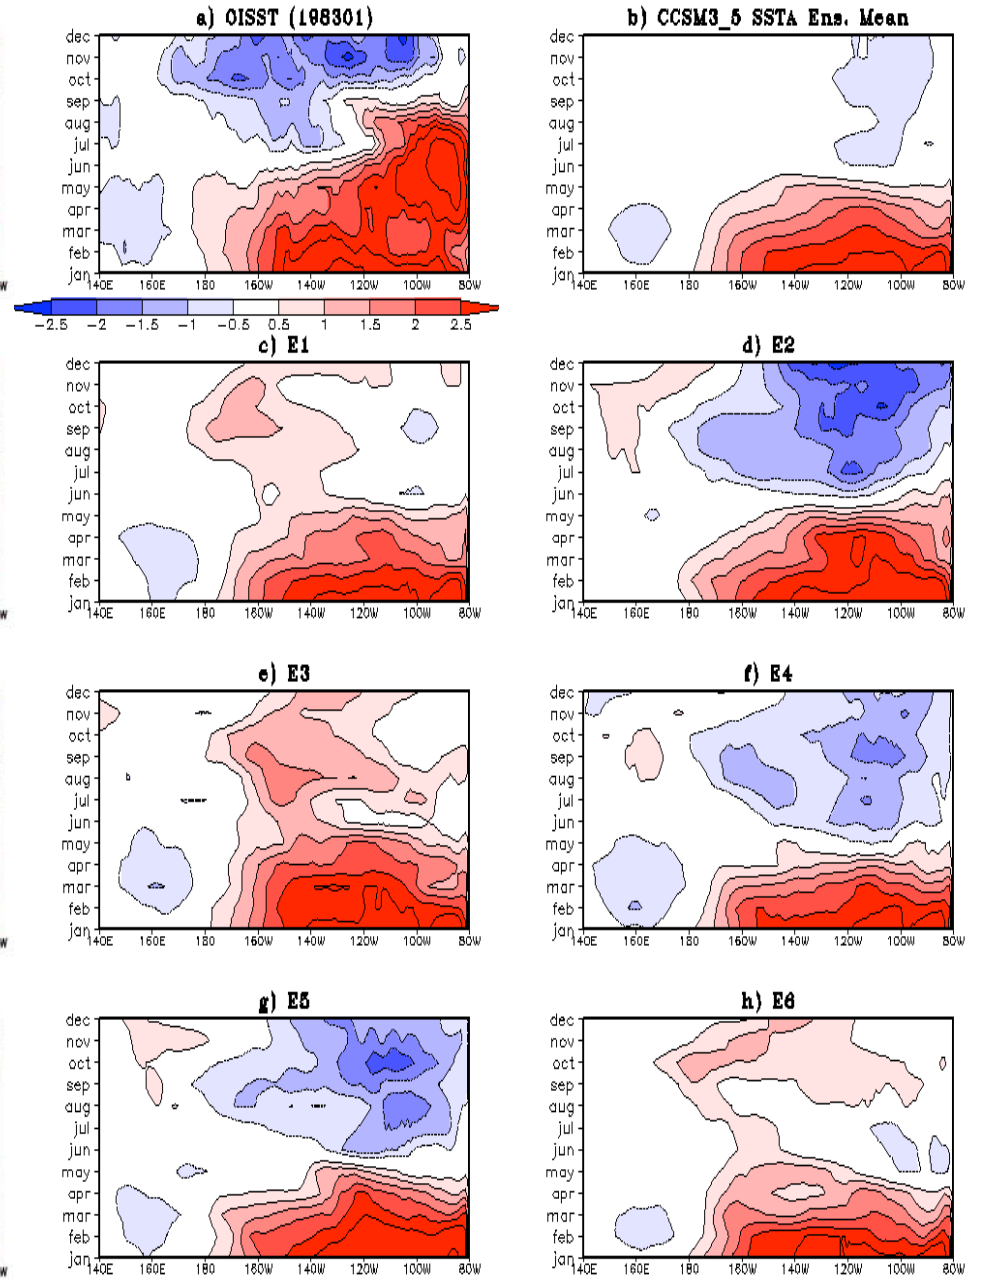

CCSM3.5 Jan 1982 IC

CCSM3.0 Jan 1983 IC

CCSM3.5 Jan 1983 IC

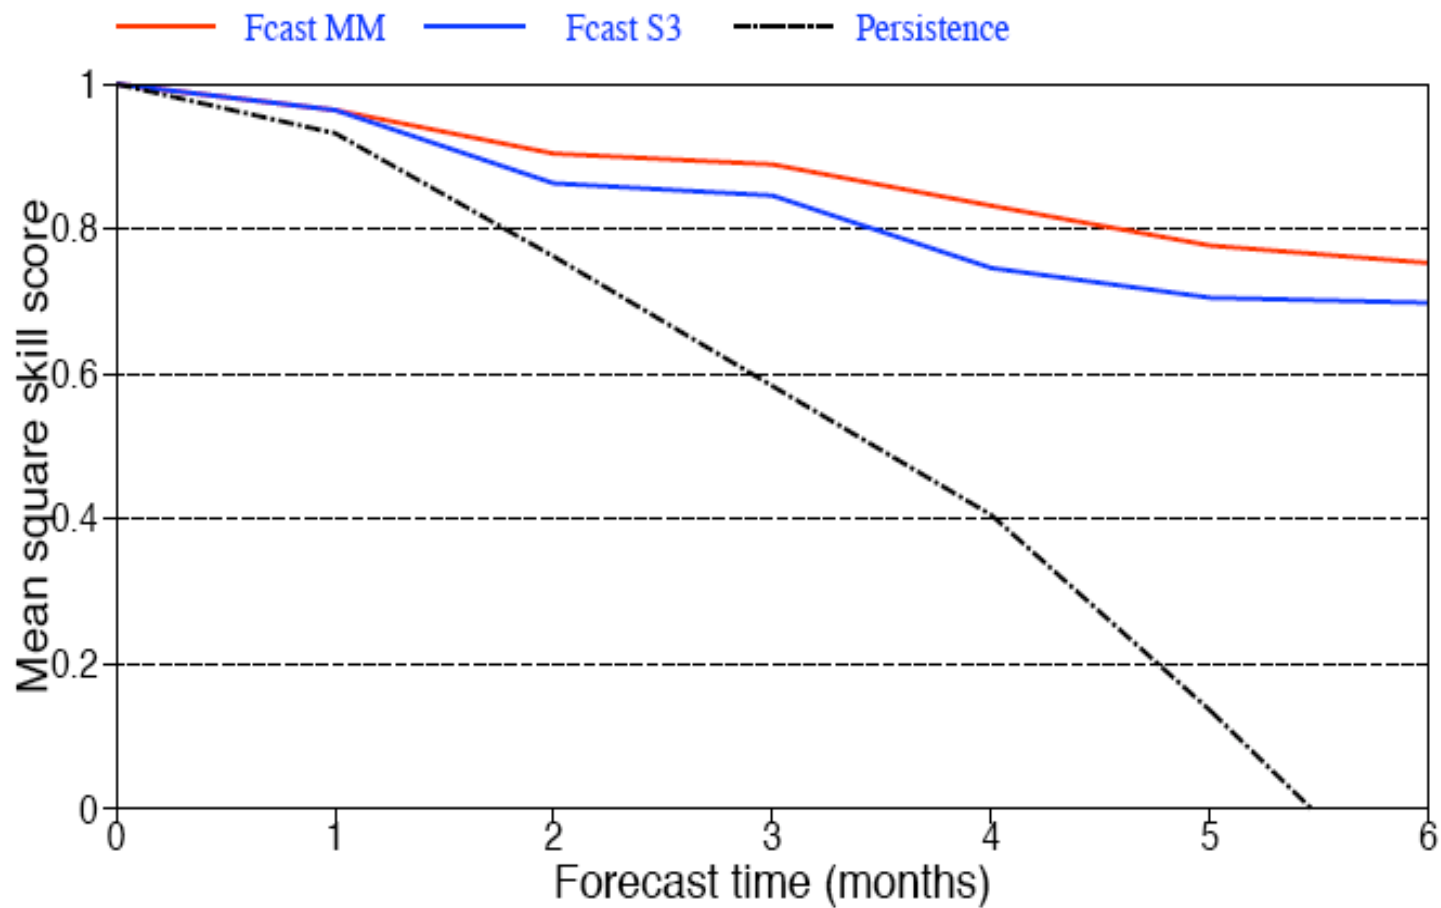

Nino3.4 Correlation 1982–1998: Jan 01 Oics

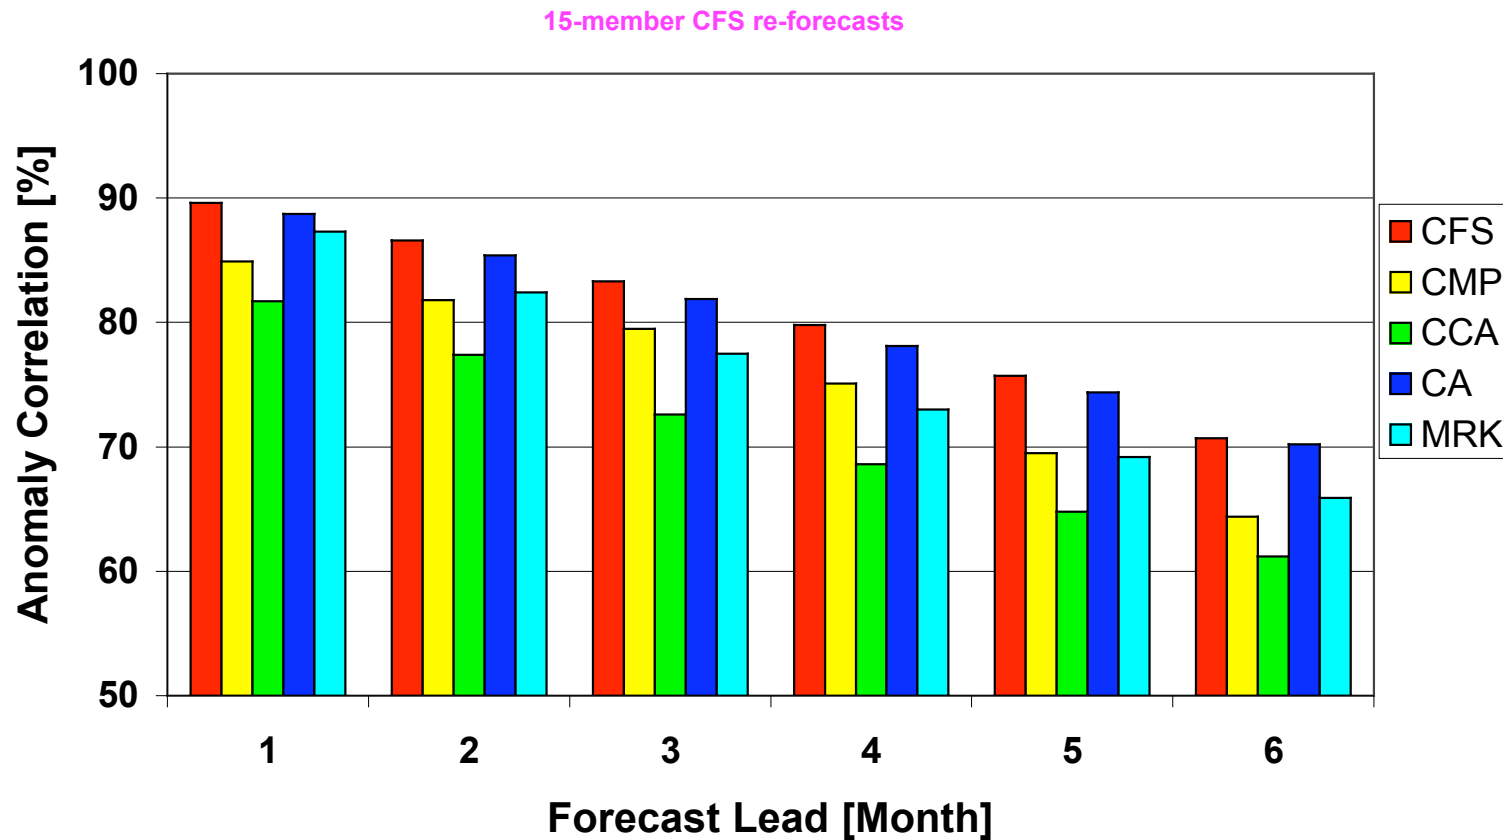

NINO3.4 SST mean square skill scores

84 start dates from 19810201 to 20011101
Ensemble sizes are 80 (MM) and 11 (0001)

Dynamic Models Improving and Competitive with Statistical Models

Skill in SST Anomaly Prediction for Nino-3.4 [DJF 81/82 to AMJ 04]

Saha et al. (2006; NCEP CFS)

No Substitute for Real Prediction

Nino34 Forecast vs. Observations 1-Month Lead

No Substitute for Real Forecasting

Nino34 Forecast vs. Observations 6-Month Lead

Conclusions

- S-I “Predictability and Prediction” Model Easily Extends to Decadal Time Scales
 - External Forcing
- Model Error Significantly Contributes to Forecast Error
- Initial Condition Error Significantly Contributes to Forecast Error
 - Model Error is an Important Part of Initial Condition Error
- Initialization
 - Some Success In Using “Unbalanced” Initial States
 - Need for Balanced Initial States

May Not Require Your Own Data Assimilation System
