

Climate Predictions to 2030:

Is it possible, what are the scientific issues, and how would those predictions be used?

22-28 July 2008

Organizing Committee: Lisa Goddard, Gerald A. Meehl, James Murphy, & Ronald Stouffer

Participant Roster

George Boer

Senior Scientist

Canadian Centre for Climate Modelling and Analysis

University of Victoria

Expertise: Climate Analysis & Prediction

Gokhan Danabasoglu

Scientist

NCAR Oceanography Section

Expertise: Ocean and Climate Modeling

Keith Dixon

Research Meteorologist

NOAA/GFDL

Princeton University

Expertise: Coupled Climate Modeling

Peter Gent

Senior Scientist

Climate and Global Dynamics National Center for

Atmospheric Research

Expertise: Climate & Ocean Modeling

Marco Giorgetta

Scientist

Max Planck Institute for Meteorology

Expertise: Stratospheric Dynamics

Lisa Goddard

Research Scientist

International Research Institute for

Climate & Society/ Columbia University

Expertise: Climate Prediction

Methodologies

Arthur Greene

Associate Research Scientist

International Research Institute for

Climate & Society

Expertise: Atlantic Meridional

Overturning Circulation

Weiqing Han

Assistant Professor

Atmospheric & Oceanic Sciences

University of Colorado, Boulder

Expertise: Ocean circulation & dynamics

Ed Hawkins

Post Doctoral Research Fellow

Walker Institute

Department of Meteorology, University
of Reading

Expertise: Decadal Predictability

Gabriele Hegerl

*Reader in Climate Dynamics and
Modelling*

University of Edinburgh

Expertise: Climate Change Detection &
Attribution, Probability & Predictions

Kathy Hibbard

AIMES Executive Officer

NCAR

Expertise: International Modeling

Aixue Hu

Project Scientist

Climate & Global Dynamics

NCAR

Expertise: Ocean circulation & dynamics

David Karoly

Professor

School of Earth Sciences

University of Melbourne

Expertise: Climate Change Detection
and Attribution

Noel Keenlyside

Research Scientist

IFM-GEORMAR

Expertise: Climate Variability &
Predictability

Masahide Kimoto

Professor

CCSR, University Tokyo

Expertise: Climate Modeling

Ben Kirtman

Professor

Meteorology & Physical Oceanography

University of

Miami

Expertise: Climate Modeling

Jean-François Lamarque

Scientist III

ACD Division of NCAR

Expertise: Atmospheric Chemistry

Gerald Meehl

Senior Scientist

Climate and Global Dynamics Division

NCAR

Expertise: Climate Variability & Change

Vikram Mehta

Executive Director

CRCES

Expertise: Climate & Societal Impacts
Science

Richard Murnane

Senior Scientist

BIOS

Expertise: Climate, Natural Hazard Risk

James Murphy

Head, Climate Prediction

Climate Research

Met Office Hadley Centre

Expertise: Climate Modeling and
Prediction

Anthony Rosati

Division of Climate Dynamics

NOAA/GFDL

Princeton University

Edwin Schneider

Professor

Climate Dynamics Department

George Mason University

Expertise: Climate Modeling, Theory & Prediction

Doug Smith

Climate Prediction Scientist

Met Office Hadley Centre

Expertise: Decadal Climate Prediction

Detlef Stammer

Professor

University of Hamburg

Expertise: Oceanography, Assimilation

Tim Stockdale

Principal Scientist

Seasonal Forecasting

ECMWF

Expertise: Seasonal Prediction

Ronald J. Stouffer

Physical Scientist

NOAA/GFDL

Expertise: Climate modeling

Claudia Tebaldi

Research Scientist

Climate Central

Expertise: Probabilistic Projections

Laurie Trenary

PhD Candidate

Dept. of Oceanic & Atmospheric Science

University of Colorado, Boulder

Joe Tribbia

Scientist

NCAR

Expertise: Climate

CONFERENCE CONVENERS

John Katzenberger

Director

Aspen Global Change Institute

Expertise: Education, global environmental change

Michelle Masone

Associate/Special Projects

Aspen Global Change Institute

Tatyana Stevens

Office/Program Manager

Aspen Global Change Institute
