Changing food consumption choices
Per capita meat consumption by type, 1961 to 2020

Per capita meat consumption is broken down by types of meat, and is measured in kilograms per person per year.

Source: Food and Agriculture Organization of the United Nations
Note: Data does not include fish and seafood. Figures do not correct for waste at the consumption level so may not directly reflect the quantity of food finally consumed by a given individual.
All of the above approach: public investment in innovation to reduce methane from food systems
