

- ***What do you identify as key opportunities for engaged research and its use?***

societal impact: climate/diversity (equity, inclusion, outreach)/justice/newest technoscientific hotness (AI anyone?)

- ***What do you see as key bottlenecks/challenges in this area?***

our understanding and misunderstanding of what counts as compelling evidence and convincing data: quantitative (numerically-driven)/qualitative (narrative-driven)—how to create supportive environments for both?

- ***What do you and other funders need from the research community (or other communities) to support action in this area?***

optimism, trust (and love): engaged research in action. Funders love actions that spontaneously emerge from “the community” or the earth/grassroots (or roots of grass), but what about dandelions, or tulips?
